

NAME: GALLA MOHAN SAI

MODULE NO : 3

Exercise 1: Control Structures:

Sample Example 1:

Give 5% Fee Discount to Students with CGPA Above 8.5

```
DECLARE
  CURSOR c_students IS
  SELECT StudentID
  FROM Students
  WHERE CGPA > 8.5;
BEGIN

  FOR stu IN c_students LOOP

    UPDATE FeeDetails
    SET FeeAmount = FeeAmount - (FeeAmount * 0.05)
    WHERE StudentID = stu.StudentID;

    DBMS_OUTPUT.PUT_LINE(
      'Fee Discount Applied For Student ID: '
      || stu.StudentID
    );

  END LOOP;

  COMMIT;

END;
/
```

OUTPUT :

Fee Discount Applied For Student ID: 101

Fee Discount Applied For Student ID: 104

Sample Example 2 :Mark Students as Merit Students

```
DECLARE

    CURSOR c_students IS
    SELECT StudentID
    FROM Students
    WHERE Marks > 90;

BEGIN

    FOR stu IN c_students LOOP

        UPDATE Students
        SET Status = 'MERIT'

        WHERE StudentID = stu.StudentID;

        DBMS_OUTPUT.PUT_LINE(
            'Merit Status Assigned To Student ID: '
            || stu.StudentID
        );

    END LOOP;

    COMMIT;

END;
```

OUTPUT

```
Merit Status Assigned To Student ID: 102
Merit Status Assigned To Student ID: 105
```

Sample Example 3: Send Reminder for Exam Registration Closing Within 15 Days

```
DECLARE

    CURSOR c_exam IS
```

```

SELECT StudentName,
       RegistrationDate
FROM Students
WHERE RegistrationDate BETWEEN
       SYSDATE AND SYSDATE + 15;

BEGIN

FOR exam_rec IN c_exam LOOP

    DBMS_OUTPUT.PUT_LINE(
        'Reminder: Dear '
        || exam_rec.StudentName
        || ', Exam Registration Closes On '
        || TO_CHAR(
            exam_rec.RegistrationDate,
            'DD-MON-YYYY'
        )
    );

END LOOP;

END;
/

```

OUTPUT:

Reminder: Dear Mohan, Exam Registration Closes On 25-JUN-2026

Exercise 3: Stored Procedures

Sample Example 1 :

Add Attendance Bonus

```

CREATE OR REPLACE PROCEDURE AddAttendanceBonus
IS
BEGIN

    UPDATE Students
    SET InternalMarks =
        InternalMarks + 5
    WHERE Attendance >= 90;

```

```
COMMIT;
```

```
DBMS_OUTPUT.PUT_LINE(  
    'Attendance Bonus Added Successfully.'  
);
```

```
END;  
/
```

Execute :

```
BEGIN  
    AddAttendanceBonus;  
END;  
/
```

Output:

Attendance Bonus Added Successfully.

**Sample Example 2 :
Increase Faculty Salary**

```
CREATE OR REPLACE PROCEDURE IncreaseFacultySalary(  
  
    p_DepartmentID IN NUMBER,  
    p_Percentage IN NUMBER  
  
)
```

```
IS
```

```
BEGIN
```

```
    UPDATE Faculty  
    SET Salary =  
        Salary +  
        (Salary * p_Percentage / 100)
```

```
    WHERE DepartmentID =  
        p_DepartmentID;
```

```
COMMIT;
```

```
DBMS_OUTPUT.PUT_LINE(  
    'Faculty Salary Updated Successfully.'  
);  
  
END;  
/
```

Execute :

```
BEGIN  
    IncreaseFacultySalary(10,15);  
END;  
/
```

Output

Faculty Salary Updated Successfully.

Sample Example 3 : Transfer Books Between Libraries

```
CREATE OR REPLACE PROCEDURE TransferBooks(  
  

```

```
    p_FromLibrary IN NUMBER,  
    p_ToLibrary IN NUMBER,  
    p_BookCount IN NUMBER
```

```
)  
IS
```

```
    v_Count NUMBER;
```

```
BEGIN
```

```
    SELECT AvailableBooks  
    INTO v_Count  
    FROM Library  
    WHERE LibraryID =  
        p_FromLibrary;
```

```
IF v_Count >= p_BookCount THEN
```

```
    UPDATE Library  
    SET AvailableBooks =  
        AvailableBooks -  
        p_BookCount
```

```
    WHERE LibraryID =  
        p_FromLibrary;
```

```
    UPDATE Library  
    SET AvailableBooks =  
        AvailableBooks +  
        p_BookCount
```

```
    WHERE LibraryID =  
        p_ToLibrary;
```

```
    COMMIT;
```

```
    DBMS_OUTPUT.PUT_LINE(  
        'Books Transfer Successful.'  
    );
```

```
ELSE
```

```
    DBMS_OUTPUT.PUT_LINE(  
        'Not Enough Books Available.'  
    );
```

```
END IF;
```

```
END;
```

```
/
```

Execute :

```
BEGIN
```

```
TransferBooks(1,2,50);
```

END;
/

Output:

Books Transfer Successful.
